Si Yue Jiang - Final Project Concepts

Firefly Catching Game

CONCEPT: You as the player play as a girl who is collecting fireflies in the forest to put into your lantern. Over time the light in your lantern fades away. However, there are monsters they are hiding in the dark waiting to eat you. They are afraid of light, so make sure your lantern is lit, or else it is game over for you.

MEANING: The game illustrates the feeling of fear of the darkness, and the monsters that hide in it.

GOAL: Survive for as long as possible.

INSPIRATION: STARVE.IO

Name Si, Yue Jiang

Date 11/16/2022

Notes

in the center of the map, there will be a tree where you can jump onto the platforms to reach higher fireflies

Notes

fireflies will generate randomly, and as time goes on, they will appear less frequently (just enough to keep you alive)

(swing can be activated on mouse click)
imaginary area collision is dependent on the stick

Notes

net mechanic — to capture fire flies

if the firefly touches the net, it is deemed captured — collision mechanic

10	Yummy	7223

Rhythm Game

CONCEPT: The game is set on a raining day, there will be an indicator where raindrops fall, and you have to press it when the raindrop makes contact with the ground. If you successfully press it to the music, a flower will grow – the type of flower that grows indicates your accuracy.

EXPRESSION: Create a chill game to wind down to, create maps set to lofi songs or other calming music.

GOAL: Press as accurately as possible.

INSPIRATION: VOEZ, PROJECT SEKAI, MUSEDASH, OSU, CYTUS

Name Si Yue Jiang

Date 11/16/2022

Notes

raindrop mechanic
there will be two circle indicators, one that stays still to mark location and one that grows in size the closer the raindrop is to the ground.

Notes

include typical rhythm game customizations:
offset timing and speed of note drops

↑
scrollable

difficulty rating

Notes

after picking out a song, final time stamps or all the notable beats → put these in an array
end screen shows stats for accuracy

Platforming Game

CONCEPT: The map is randomly generated, but as the player, you have the ability to add onto the map. When you click with your mouse, a flower will grow at the position, acting as a platform to get to new places. You are also given a watering can, so you can only grow a certain amount of flowers. There will also be fountains where you can refill your watering can. OR have the player character itself hold water. Possibilities of using voice recognition to control character.

GOAL: Go as high as you can before you fall or are unable to progress further.

INSPIRATION: GRIS, VERTICAL SCROLLING JUMPER GAMES, HOLLOW KNIGHT

Name S. Yue Jiang

Date 11/16/2022

Notes

platform are auto-generated
OCCASIONALLY THE
platforms will be too
far apart, therefore
you need to create a
platform.

Notes

fountain mechanics:
you can refill your
watering can at fountains,
these fountains are generated
when you have one
flower left.
